Welcome to COL's Booking Form. Here you may request to have our student led musical groups perform at your event. Our micro-enterprise model for music and arts education teaches students that hard work, professionalism and developing their natural gifts is a means by which they can succeed. When you submit a booking request, you will hear back from COL. **A booking is not finalized until a COL representative confirms with you and acquires additional information.** Thank you for considering COL for your event. Every time we are hired, another student's life may be changed by the experience.

The KRUNK Movement (Kreating Realistic Urban New-School Knowledge) is a student led music and health initiative that uses the elements of hip-hop, dance, recording engineering, visual art and equipment management to communicate positive messages about mental and physical health to teens and pre-teens. Designed as a production company, students learn how to start and run a small business. Our songs involve students in every aspect of hip-hop and dance production.

COL Jazz is a God inspired, relevant musical mix of the past, present, and future. The band integrates contemporary and standard songs with the history-rich tradition of jazz. Since 2000 COL Jazz has provided young gifted instrumentalists with the opportunity to play at a professional level around the city, state and country. As part of a larger program known as the KRUNK Movement, students in COL Jazz seek to use their talents to bring knowledge about music, health and business to youth everywhere.
